Zyglarska	Anastasia	
	4 Jun Niag. Falls	14182

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out a vision for the future of older people's services. The strategy is based on the principle of 'active ageing', which is the process of maintaining and enhancing the health, participation and security of older people. The strategy also sets out a number of key objectives, including: to improve the health and well-being of older people; to increase the participation of older people in society; and to ensure that older people are secure and safe.

The strategy also sets out a number of key actions, including: to improve the health and well-being of older people; to increase the participation of older people in society; and to ensure that older people are secure and safe. The strategy also sets out a number of key actions, including: to improve the health and well-being of older people; to increase the participation of older people in society; and to ensure that older people are secure and safe.
